

## 'linx-IR' Receiver Module and Flat IR Target

### FEATURES

- Receiver Module for use in resi-linx® NEW 'linx-IR' Discrete Infra Red system with RL-IR305 (Distribution Module) and RL-IR700 (single) or RL-IR800 (double) Emitter
- Advantage of Discrete IR control of specific AV devices from each zone via Dip Switch selection
- Facility for IR control of local AV device/s by connecting RL-IR700/800 Emitter directly to Receiver Module
- Easily extendable cable distance from Receiver Module by 'Plug and Play' facility using RJ45 connector to either Distribution Module or RL-IR170 (IR Distribution Hub)
- Built-in LED to show acknowledgement of IR commands and Power status
- Powered remotely by Distribution Module

### SPECIFICATIONS

Frequency Range	20 kHz - 200 kHz
Cable Length Included	1.75 metres
Max. Cable Length (m)	Up to 60 metres
Max. Target Reception Distance	Up to 10 metres
Max. Targets per System - inc. RL-IR305	Up to 7 Targets (via RL-IR170)
Size (mm) body	70 x 40 x 23
